## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1-20 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record does not disclose or teach a method of repairing the end fittings of a water-cooled stator bar by applying a protective coating consisting of the claimed materials in combination with the other features of claims 1 and 12. The prior art of record does not disclose or teach a method of repairing the end fittings of a water-cooled stator bar by disconnecting the inlet or outlet end fittings into two segments having a mated dovetail in combination with the other features of claims 6 and 16. The prior art of record does not disclose or teach a liquid or water-cooled stator bar having brazed joints with a protective coating consisting of the claimed material in combination with the other features of claims 10 and 11.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Speirs et al. 3,922,396 teaches placing a corrosion resisting layer on stainless steel aircraft components. Hirota et al. 6,852,428 B2 teaches placing a braze leakage inhibitor on the combustor of a gas turbine. Kacines et al. 6,447,020 B1 teaches that plating brazed assemblies used in conducting fluids such as brake fluid and air conditioning fluid have been used in the automotive industry. None of the prior art references teaches applying a metallic plating to brazed parts conducting water or to stator parts of a generator.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
